DWA_04.3 Knowledge Check_DWA4

_____

1.
 Select three rules from the Airbnb Style Guide that you find **useful** and explain why.
- ➔ Use const for all references, avoid using var. We can not reassign a reference, reassigning a reference can lead to a bug and difficulties to comprehend code.
- ➔ Use literal syntax for object creation
  - ◆ Use curly braces to specify properties and values.
  - ◆ Avoid the need for additional constructor functions or methods to create objects
  - ◆ The syntax makes the code more readable and self-explanatory.
- ➔ Use array spread(...) to copy arrays
  - ◆ To copy an array is a convenient and concise way to create a shallow copy of an existing array.
  - ◆ Spread syntax allows you to expand an array into individual elements.

_____

2. Select three rules from the Airbnb Style Guide that you find **confusing** and explain why.

Use single quotes for strings, in my previous learning I learnt that single and double quotes are the same.

Do not include javascript filename extensions
Because if you do not include extension file names the imported data is not going to work. It is going to throw and error

Multiple imports should be indented just like multiline array and object literals
I know that you can either write imports on the same line or write each import file on its own line.
